

DEPARTMENTAL SEMINARS

Spring Term 2021

- 11 Jan** **Annika Reintges (GEOMAR)**
Wind Stress-Induced Multiyear Predictability of Annual Sea Surface Temperature Anomalies in the Extratropical North Atlantic
- 18 Jan** **Marie Drouard (University Complutense of Madrid)**
Atmospheric blocking duration in the Northern Hemisphere
- 25 Jan** **Cancelled**
- 01 Feb** **John Lynch (University of Oxford)**
Agriculture's contribution to climate change and mitigation
- 08 Feb** **Tim Graham (Met Office)**
Global Atmosphere-Ocean Coupled NWP at the Met Office: towards operations and future developments
- 15 Feb** **Sarah Dry**
How climate became global: the history of an idea in six lives
- 22 Feb** **Cancelled**
- 01 Mar** **Christian Grams (Karlsruhe Institute of Technology)**
Towards a dynamical understanding of predictability and forecast skill for weather regimes in the North Atlantic European region
- 08 Mar** **Ann Webb (University of Manchester)**
Maintaining Your Vitamin D Status: Climate vs Colour, Culture and Covid
- 15 Mar** **Sebastian Sippel (ETH Zurich)**
Characterizing and detecting climate signals in observations and models using statistical learning
- 22 Mar** **Jennifer Catto (University of Exeter)**
Stormy weather: understanding hazards from a weather system perspective
