Autumn Term 2020

28 Sep Regina R. Rodrigues (Federal University of Santa Catarina)
Marine heatwaves in the South Atlantic in the context of compound extreme events in South America

5 Oct Emily Grossman
Emergency on Planet Earth

12 Oct Claudia Di Napoli (Environmental Science, University of Reading)
The human side of heat extremes: climatology and forecasting of heatwave-related health hazards

19 Oct Benjamin J. Murray (University of Leeds)

26 Oct Elizabeth A. Barnes (Colorado State University)
Viewing Climate Signals through an AI Lens

2 Nov* TBC
(15:00)

9 Nov Maria-Paz Zorzano Mier (Centre of Astrobiology, INTA/CSIC; Luleå University of Technology)
Atmospheric observations of Mars, a multi-instrumental approach

16 Nov Karina Williams (Met Office)
Water stress in the JULES land-surface model

23 Nov Marta Marcos (University of the Balearic Islands)
Observations and drivers of coastal sea level extremes

30 Nov Penny Maher (University of Exeter)
The flexible modelling framework for the Met Office Unified Model (Flex-UM)

7 Dec Annika Reintges (GEOMAR, Germany)

*note the 2nd November seminar is at 15:00 due to the time difference
