

Summer Term 2018

16 Apr **Florent Brient (CRNM, Toulouse)**

Tropical marine stratocumulus and their influence on the climate system

23 Apr **No Seminar**

30 April **Chris Lintott (University of Oxford)**

Tales from the Zooniverse

8 May **Adam Scaife (Met Office)**
(Tuesday 1pm)

A signal to noise paradox in climate science

14 May **Andrew Ross (University of Leeds)**

Forest canopy flows over hilly, heterogeneous terrain - theory and experiments

21 May **Jean-Paul Vanderlinden (CEARC, Paris)**

Transdisciplinary climate studies: experimenting localized integrated art-science-policy approaches to knowledge production, sharing, and use

29 May **Peer Nowack (Imperial College London)**
(Tuesday 1pm)

The representation of ozone in climate sensitivity simulations: from interactive chemistry to machine learning

4 Jun **Olivia Martius (University of Bern)**

Recent hail research in Switzerland - the challenges and delights of complex orography and crowdsourced data
