Fish catch food in strange ways

A torpedo ray is a large, flat fish.

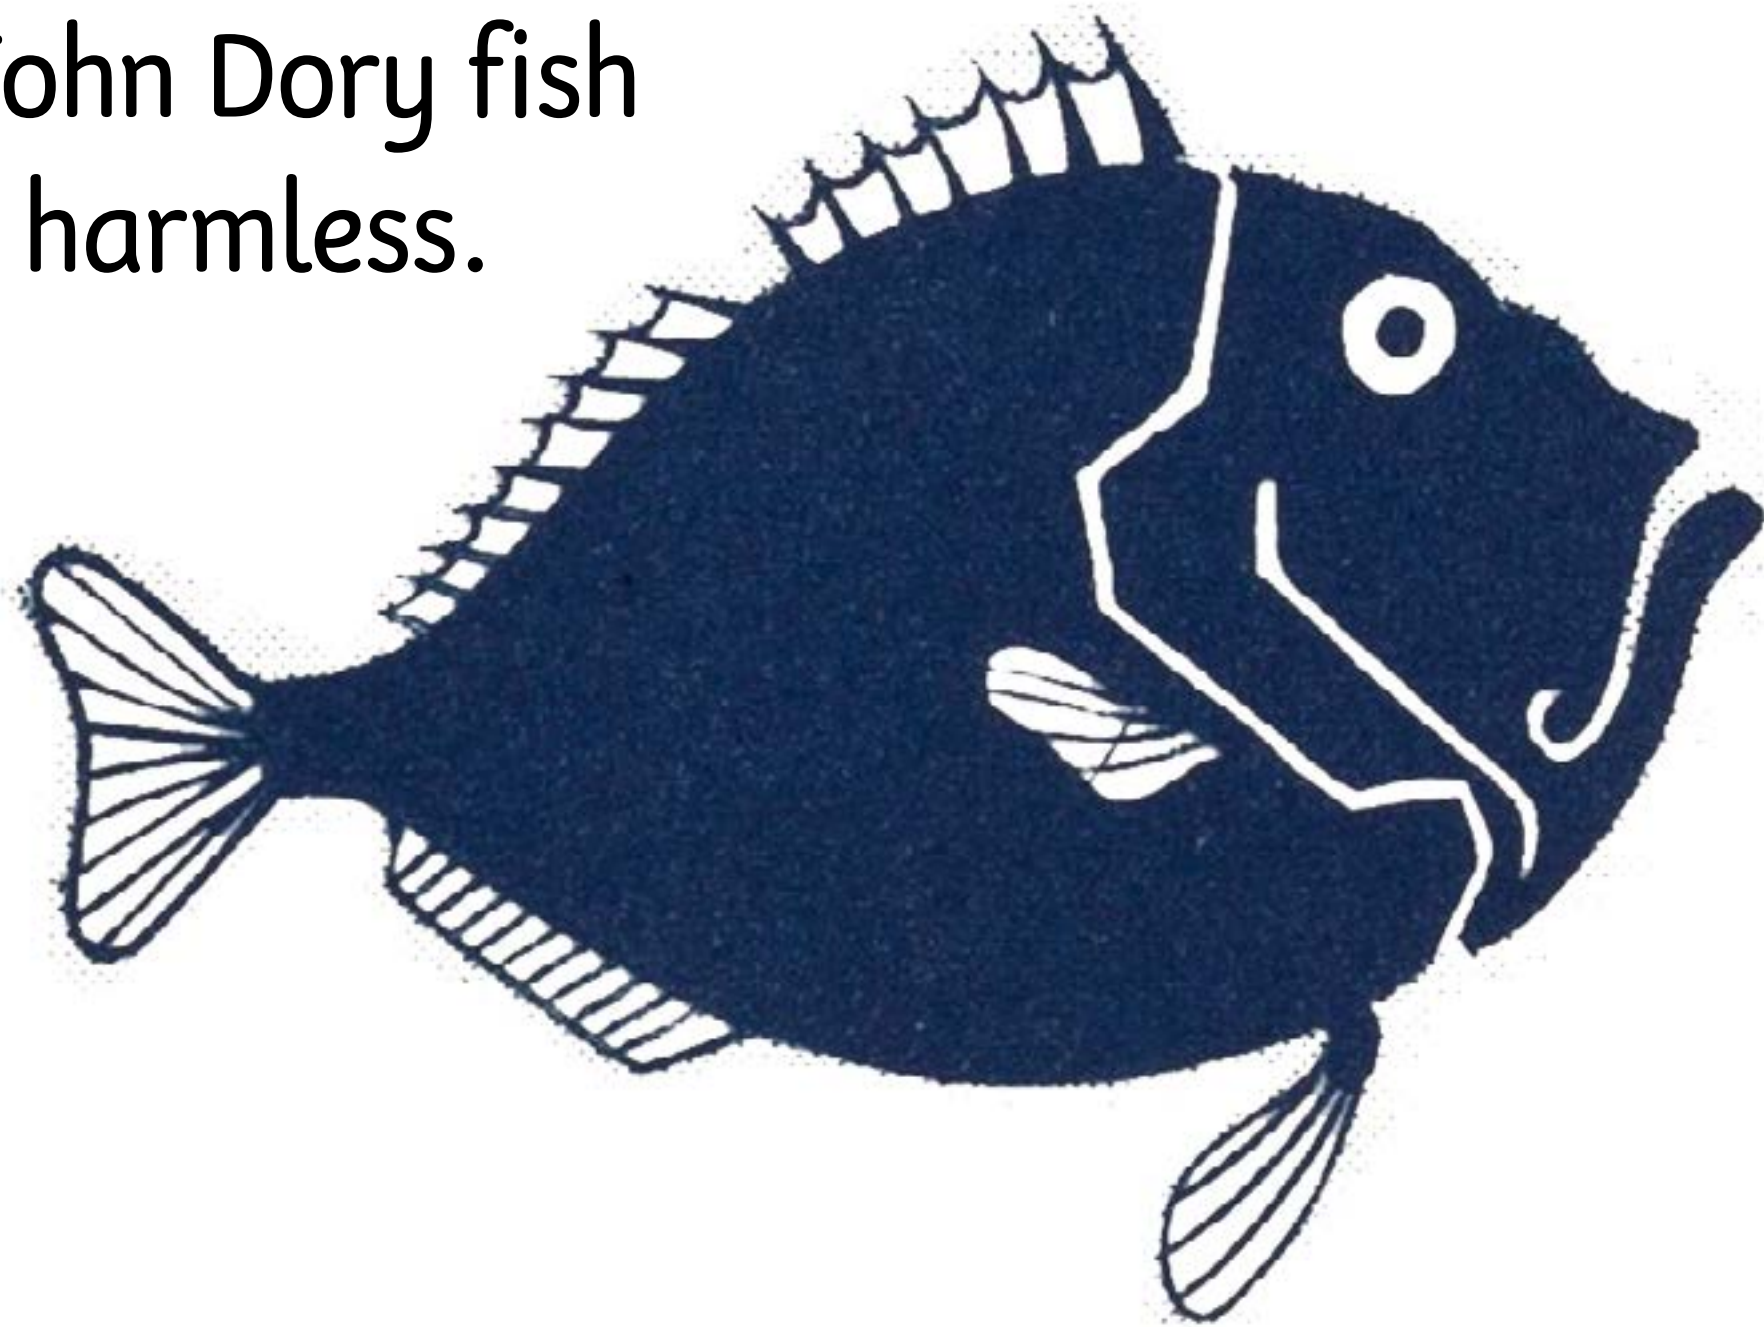

When it is hungry, it swims under a small fish, then he darts up and give it an electric shock.

While it is still stunned, he eats it.

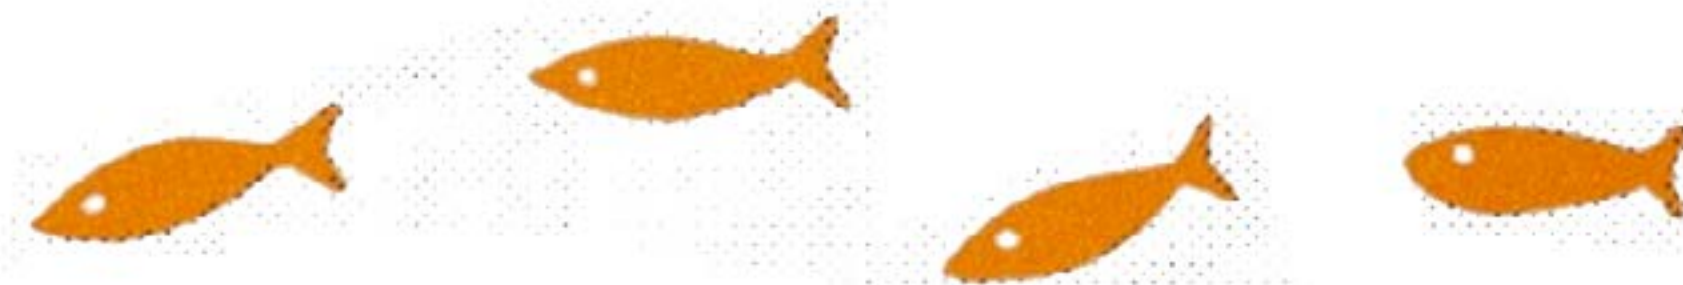

Fish catch food in strange ways

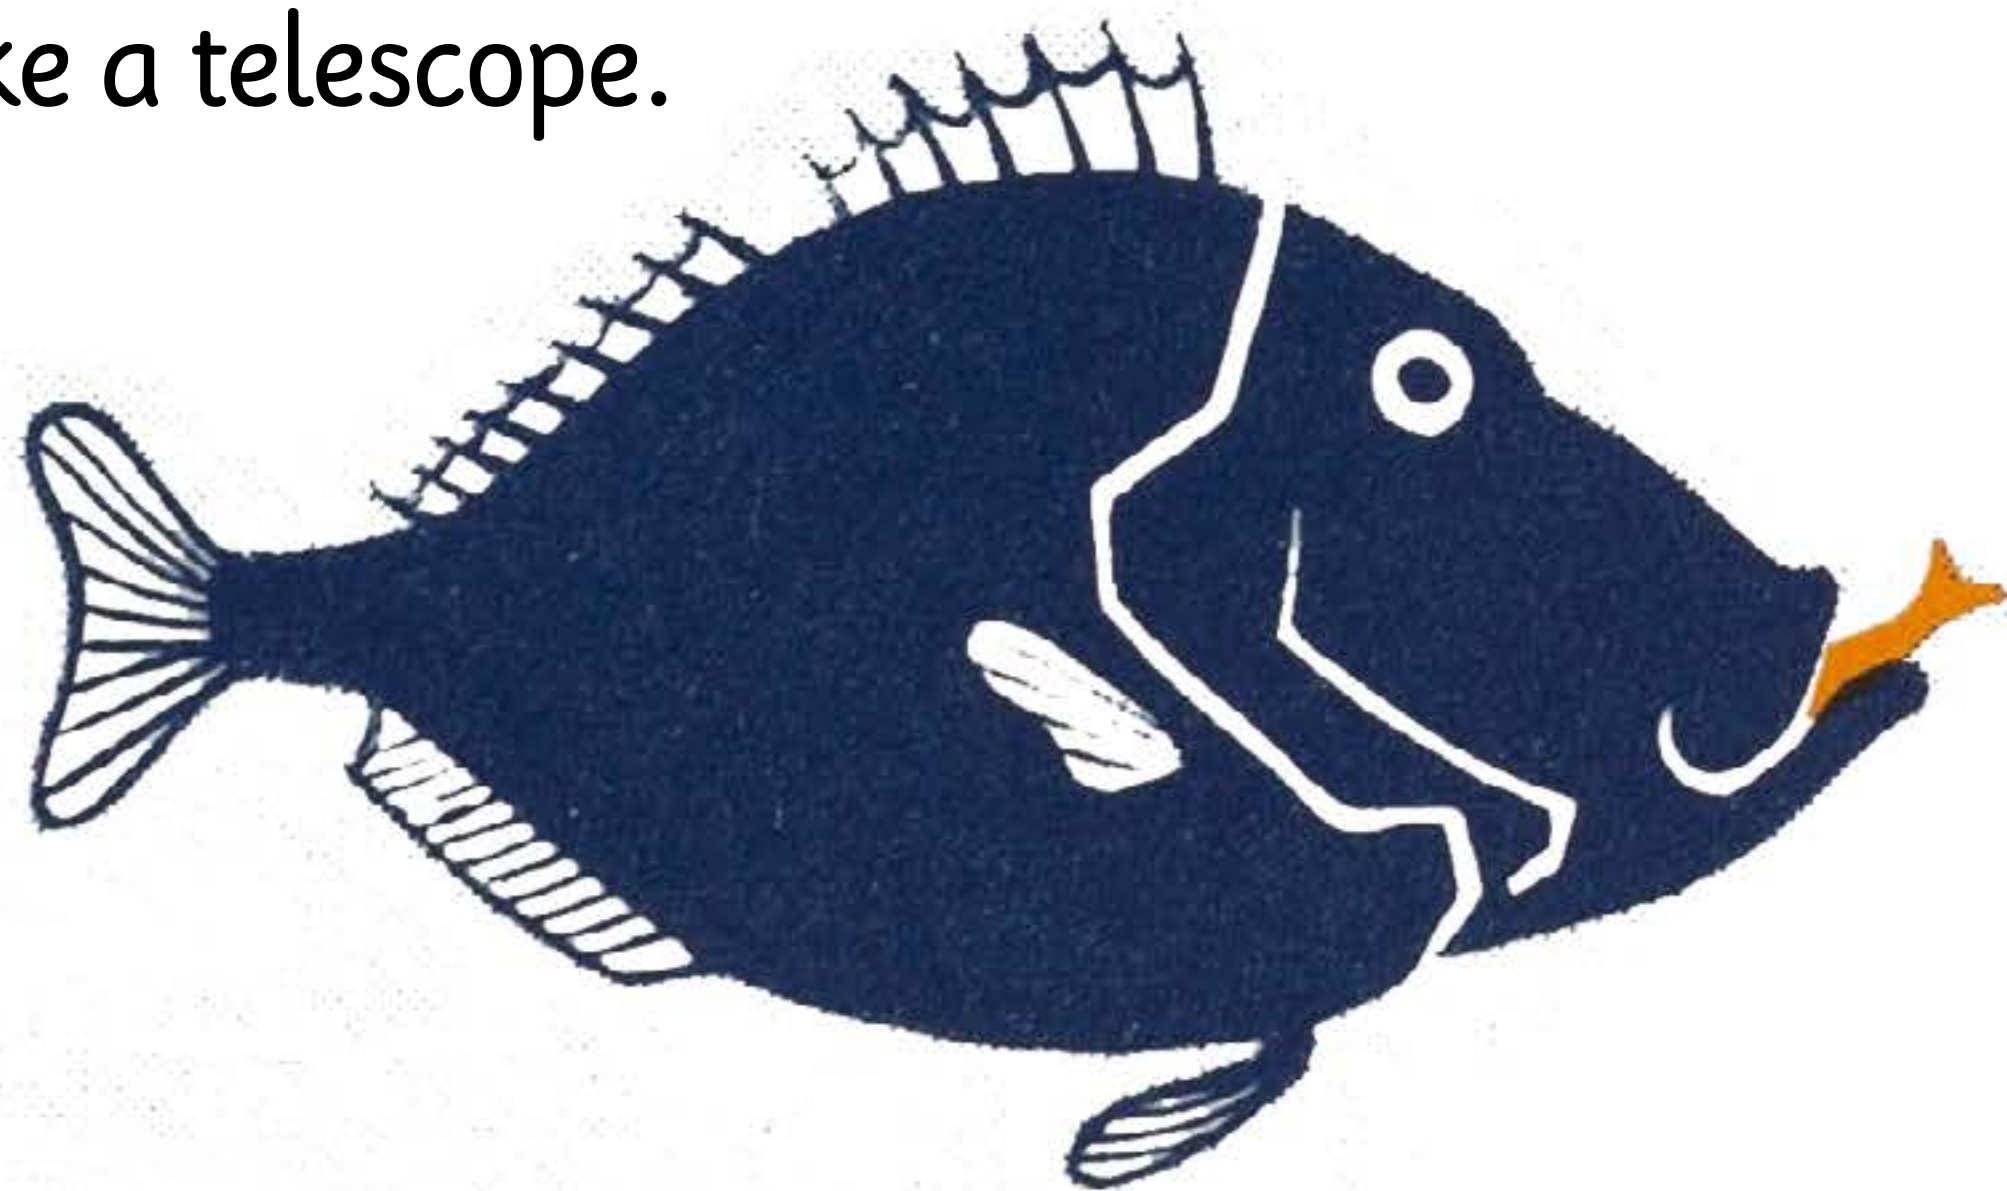

The John Dory fish looks harmless.

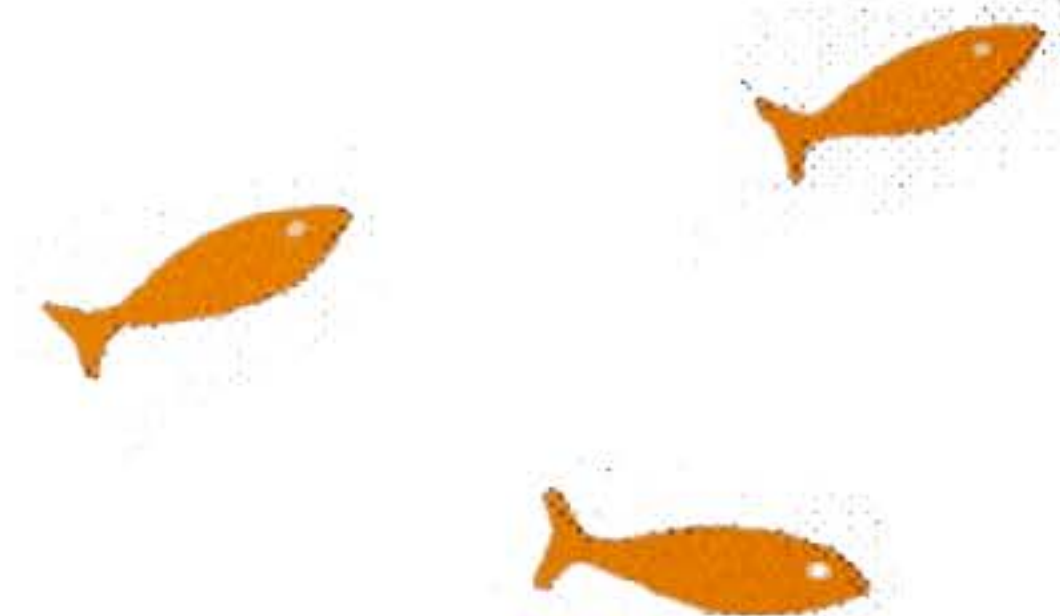

Here are four small fish swimming by.

Suddenly his jaw shoots out like a telescope.

There are only three small fish to swim away.

Fish catch food in strange ways

An octopus hides amongst the rocks, watching and waiting. A crab crawls by.

The octopus sticks out its long arms and pulls the crab in.
