# Dinosaur Silhouette Printing Art

You will need:
- White card
- Paint: variety of colours
- Sponges
- Dinosaurs Silhouette template
- Optional: Glue stick and black card
- Scissors

1) First, print out the Dinosaurs Silhouette template. Then, use the scissors to cut neatly around the dinosaur templates.

2) Then, place the dinosaur template in the centre of the white card.

3) Next, dip a sponge into one of the paint colours.
Dab the painted sponge repeatedly over the white card and around the dinosaur template.

4) Use the sponges to dab all the colours over the white card until it is completely covered.
Remember to dab the sponges over the edges of the dinosaur template.

5) Carefully remove the dinosaur template from the painted card to reveal a clean, bright silhouette of the dinosaur.

6) Alternatively, you can create a bold, black silhouette for your dinosaur artwork.
Place your cut out template over the black card and neatly draw around the outline with a pencil.
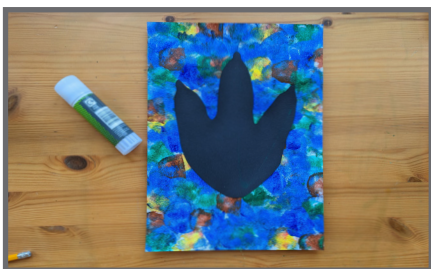

7) Next, cut around the pencil outline neatly with the scissors. This will create your black card silhouette.

8) Use the sponge and paints to create a bright, dappled background.
Allow the paint to dry.

9) Use the white glue to secure the black card silhouette onto the painted background.
Allow the glue to dry.
