Reading 2050 - our CONNECTED alumni magazine's feature article on the vision for the town

Research support at Reading Research and Enterprise Services has an updated website – use it to find out about:

- Funding sources, deadlines and requirements – including lists of current and recurring funding calls, help with preparing an application, and costing your proposal
- Post-award support – setting up your grant, contracts, data management, reporting,
- Support with Impact, Intellectual property and patents, and Consultancy.

Don’t forget to tell them the outcomes and feedback of your funding submissions so they can ensure the learning benefits everyone.

Your Research Development Manager will also keep you updated on the latest policy and advice – such as the recent news that UKRI no longer requires a pathways to impact plan for all funding applications. Impact will still be one of the grant assessment criteria and applicants must consider how they will achieve impact throughout their projects and include this as part of the case for support.

RES would like to understand better how people want to find out about funding opportunities – please take 5 minutes to complete this short survey to inform future support in this area.
Professor Dominik Zaum (Politics and International Relations) has been appointed to the Department for International Development's Science Advisory Group. Professor Zaum's expertise and experience will help ensure that the group continues to provide the Department for International Development (DFID) with the best independent scientific advice.

Our proposal to exhibit at the Royal Society's Summer Exhibition 2020 has been approved following a competitive selection process. This exhibition is the UK's highest profile scientific public engagement event, and will showcase work led by Professor Hannah Cloke (Geography and Environmental Science) on flood forecasting.
