

WP 3 Law

Chris Hilson

June 2024 update, PMB

Impact work

- Written submission to UK Parliament (House of Lords) Inquiry on Methane, March 2024
- Written submission (with Professor Chittur Srinivasan) to the UK Parliament Energy Security and Net Zero Committee as part of its 'Net zero and trade' inquiry, May 2024

Report progress

- Intro sections all complete
 - Report aims and approach (regulatory mapping exercise of UK HSD-related food system problems and regulatory solutions for achieving HSD)
 - 'Problem-cause-solution' framework
- Identification of various **HSD** food system problems, across **social, economic** and **environmental** sustainability, and also **health**
- These include eg food waste, local pollution, climate/GHG, resource over-use, economic access/affordability (of HSD foods) etc
 - Health problems part still to do

Report progress

- **Causes** of these problems are identified (who, and what?)
- **Regulatory tools/solutions** are touched on **as part of each of those problems** in turn
- There is then also a more **horizontal** regulatory tools/solutions **taxonomy**, including eg **targets, economic instruments, command and control, informational instruments**
 - **Targets** done
 - **Economic instruments** done
 - **Command and control and informational instruments** done in draft – ready for editing
